

Is your ESD Control Program in Compliance?

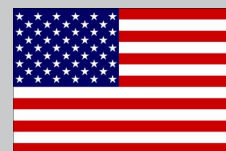

- *Is it compliant to your own internal standards*
- *Is it compliant to your customer(s) standards?*
- *Is it compliant to industry accepted standards?*
- *Is it costing your company too much money and/or future business?*

Answer these questions and more with a
no-charge ESD survey.

An ESD Survey will verify that your ESD products and program are in accordance with the minimum recommended technical requirements of ANSI/ESD S20.20, and your ESD control products are being used properly. Upon completion of the survey, we will provide a written report of the findings with suggestions for improvements if needed and citations to applicable ESD association paragraphs.
