MANUFACTURED FROM RECYCLED, 100% POST CONSUMER, HIGH DENSITY POLYPROPYLENE

Conductive Ultra Stack Bins & Dividers

Protect your electronic components from typical electromagnetic interference (EMI), electrostatic or induced fields with these conductive polypropylene bins. The conductive material provides a barrier which these fields cannot penetrate and prevents the build-up of an electrostatic charge. Bins are permanently conductive and are unaffected by washing with normal cleaners. Molded from a carbon filled copolymer polypropylene material with an electrostatic decay rate at less than 0.1 second that meets conductivity standards as tested with ASTM-D257 methods. Its surface resistivity is less than 10⁵ Ohms-per square. Easy access to stored items with hopper front bin and label holder provides fast identification. Reinforced side walls and wide ledge allow high stacking on benches or shelving. Be sure all bins are properly grounded according to your use.

Conductive Shelf Bins

Protect your electronic components from typical electro-magnetic interference (EMI), electrostatic or induced fields with these molded, carbon-filled, copolymer polypropylene bins. Surface resistivity is less than 10⁵ Ohms-per square. Easy access to stored items with hopper front bin and label holder provides fast identification. The conductive material provides a barrier which these fields cannot penetrate and prevents the build-up of electrostatic charge. Bins are permanently conductive and are unaffected by washing with normal cleaners. Be sure all bins are properly grounded according to your application.

Stainless Steel - 304 Stainless with an electro-polish finish represents the highest industry standard in the prevention of corrosion. This finish is highly effective for corrosive, high humidity or clean room environments. **Lifetime warranty for 304 stainless steel electro-polish finish.**

Proform Green, Gray and Black Epoxy - are an ideal solution for high humidity, wet, or walk-in-cooler applications. Polymer Dunnage Racks

Our Dunnage Racks are as portable as they are versatile. Made from lightweight, heavy-duty high density polyethylene, these are the perfect match for wet or chemically intense manufacturing environments. A simple snap together design makes it a breeze to raise finished goods and raw materials off the ground and away from moisture, dirt and traffic. When it comes to cleanup time, just sweep underneath! We offer the largest commercially available sizes in a high-capacity, low-cost dunnage solution that lets you reset and move workstations as often as you see fit. Plus, the grid-top design simplifies working with fluids and bagged goods because any spilled items will flow through the surface to the floor below.
